

READ-ME file

Agricultural Fires and Health at Birth

M. A. Rangel and T. Vogl, The Review of Economics and Statistics

Abstract

This file describes data sets and program files for replication of results displayed in Tables and Figures of the main text of the article.

Note:

All analyses on the article utilize Stata-SE 13.1. Exception is OA_FigureA1 on the online appendix which requires QGIS software.

Main Text Figures

Element	Do-file	Input data	Output
Figure 1	T_Figure1.do	rolling_fires_SPstate.dta calendarmonth_fires_SPstate.dta	T_Figure1_fires_PanelA.gph T_Figure1_fires_PanelB.gph

Main Text Tables

Element	Do-file	Input data	Output
Table 1	T_Table1.do	fires_sugarproduction_yearly.dta fires_jobsflows_monthly.dta	Table1_productionjobs_vs_fires.out
Table 2	T_Table2.do	fires_pollution.dta requires our own "wildareg.ado"	Table2_pollution_fires.out Table2_pollution_fires.log
Table 3	T_Table3.do	fires_birthoutcomes.dta requires our own "wildareg.ado"	Table3_birthoutcomes13locales_`depvar'.out Table3_birthoutcomes13locales_`depvar'.log
Table 4	T_Table4.do	fires_birthoutcomes_wfetaldeath.dta requires our own "wildareg.ado"	Table4_birthoutcomes13locales_`depvar'.out Table4_birthoutcomes13locales_`depvar'.log
Table 5	T_Table5.do	fires_birthoutcomes.dta requires our own "wildareg.ado"	Table5_birthoutcomes13locales_`depvar'_robustness.out Table5_birthoutcomes13locales_`depvar'_robustness.log Table5_birthoutcomes13locales_`depvar'_falsification1.out Table5_birthoutcomes13locales_`depvar'_falsification1.log Table5_birthoutcomes13locales_`depvar'_falsification2.out Table5_birthoutcomes13locales_`depvar'_falsification2.log Table5_birthoutcomes13locales_`depvar'_falsification3.out Table5_birthoutcomes13locales_`depvar'_falsification3.log

Codebook/Dictionary

1. rolling_fires_SPstate.dta

Contains data from ../RESTAT_data/rolling_fires_SPstate.dta

obs: 3,442
vars: 9
size: 79,166

variable name	storage type	display format	value label	variable label
date	int	%td		date
nr_risks	float	%9.0g		total number risk-adjusted fires in that date, state of SP
nr_fires	int	%9.0g		total number fires in that date, state of SP
sum_nr_risks	float	%9.0g		total number risk-adjusted fires, in state past 14 days
yrsum_nr_risks	float	%9.0g		total number risk-adjusted fires, in state past 365 days
sum_nr_fires	int	%9.0g		total number fires, in state past 14 days
yrsum_nr_fires	int	%9.0g		total number fires, in state past 365 days
year	int	%9.0g		year (yyyy)
month	byte	%9.0g		calendar month (mm)

2. calendarmonth_fires_SPstate.dta

Contains data from ../RESTAT_data/calendarmonth_fires_SPstate.dta

obs: 12
vars: 4
size: 156

variable name	storage type	display format	value label	variable label
month	byte	%9.0g		month
mean_nr_risks	float	%9.0g		average monthly number risk-adjusted fires, in state for calendar month
mean_nr_fires	float	%9.0g		average monthly number fires, in state for calendar month
mean_milled	float	%9.0g		average monthly milled tons of sugarcane, in state for calendar month

3. fires_sugarproduction_yearly.dta

Contains data from ../RESTAT_data/fires_sugarproduction_yearly.dta

obs: 7,095
vars: 12
size: 141,900

variable name	storage type	display format	value label
year	int	%9.0g	year (yyyy)
sum_risks	float	%9.0g	number of risks in municipality accross all sats (area adjusted)
gdp_pc	float	%9.0g	ln gdp per capita
Ish_harvested	byte	%9.0g	has harvested sugarcane in year
sh_harvested1	byte	%9.0g	(share of munic. area corresponding to harvested sugarcane<=.05)
sh_harvested2	byte	%9.0g	(0.05< share of munic. area corresponding to harvested sugarcane <=.15)
sh_harvested3	byte	%9.0g	(0.15< share of munic. area corresponding to harvested sugarcane <=.25)
sh_harvested4	byte	%9.0g	(0.25< share of munic. area corresponding to harvested sugarcane <=.35)
sh_harvested5	byte	%9.0g	(0.35< share of munic. area corresponding to harvested sugarcane <=.50)
sh_harvested6	byte	%9.0g	(0.5< share of munic. area corresponding to harvested sugarcane <=.75)
sh_harvested7	byte	%9.0g	(0.75< share of munic. area corresponding to harvested sugarcane <=1)
fe_munic	int	%9.0g	municipality id

4. fires_jobsflows_monthly.dta

Contains data from ../RESTAT_data/fires_jobsflows_monthly.dta

obs: 46,440
vars: 7 26 Oct 2018 08:20
size: 1,114,560

	storage	display	value	
variable name	type	format	label	variable label
yearmonth	int	%tm		year-month running variable
fe_munic	int	%9.0g		municipality id
entry	float	%9.0g		hired individuals in month - all sectors, per 2010 pop
exit	float	%9.0g		job terminations in month - all sectors, per 2010 pop
mean_adm_wage	float	%9.0g		average wage - hired personnel, \$1,000 per 2010 pop
mean_exit_wage	float	%9.0g		average wage - terminated personnel, \$1,000 per 2010 pop
dnr_risks_norm	float	%9.0g		month change in risk-adjusted fires' count (per 100km_sq)

5. fires_pollution.dta

Contains data from ../RESTAT_data/fires_pollution.dta

obs: 28,379
vars: 884 29 Oct 2018 09:24
size: 28,946,580

variable name	variable label
CODMUNIC_6D	IBGE municipality code
station_id	CETESB station code
date_BR	date
wpop	births in week-location, weights for regression
PM10_dayavg_week0	PM10 weekly average of readings (microgram/cubic meter)
RH_dayavg_week0	Rel Humidity weekly average of readings (%)
TEMP_dayavg_week0	Temperature weekly average of readings (Celsius)
NOx_dayavg_week0	Nitro-Oxides weekly average of readings (ppb)
O3_dayavg_week0	Ozone weekly average of readings (microgram/cubic meter)
NNE_wind_week0	share of hours wind originating from NNE octant
ENE_wind_week0	share of hours wind originating from ENE octant
ESE_wind_week0	share of hours wind originating from NSE octant
SSE_wind_week0	share of hours wind originating from SSE octant
SSW_wind_week0	share of hours wind originating from SSW octant
WSW_wind_week0	share of hours wind originating from WSW octant
WNW_wind_week0	share of hours wind originating from WNW octant

NNW_wind_week0	share of hours wind originating from NNW octant
nowindmeas_week0	share of hours no wind direction or calm
nonprvwinds_week 0	share of days without prevailing wind
RHTEMP_dayavg_week0	interaction RH and TEMP, centered at mean
year	year
woy	week-of-year
fe_yearmunic	year-municipality id
fe_weekmunic	week of year-municipality id
nr_fires5_week0	number of fires detected within city limits (5km radius)
nr_risks50_week0	count of probability-weighted fires within 5-50km of station
pv_nr_risks50_week0	count of probability-weighted fires within 5-50km of station, from prevailing octant
opv_nr_risks5_week0	count of probability-weighted fires within 5-50km of station, from octant opposing prevailing octant
npv_nr_risks50_week0	count of probability-weighted fires within 5-50km of station, from other non-prevailing octants
res_nr_risks50_week0	count of probability-weighted fires within 5-50km of station, from all non-prevailing octants
znr_risks50_week0	z-scored count of probability-weighted fires within 5-50km of station
zres_nr_risks50_week0	z-scored count of probability-weighted fires within 5-50km of station, from all non-prevailing octants
zpv_nr_risks50_week0	z-scored count of probability-weighted fires within 5-50km of station, from prevailing octant
zopv_nr_risks50_week0	z-scored count of probability-weighted fires within 5-50km of station, from octant opposing prevailing octant
znpv_nr_risks50_week0	z-scored count of probability-weighted fires within 5-50km of station, from other non-prevailing octants
zpvst_nr_risks50_week0	z-scored count of probability-weighted fires within 5-50km of station, from stricter prevailing octant
zpv_nr30d_risks50_week0	z-scored count of probability-weighted fires within 5-50km of station, from 30d prevailing section
zpv_nr90d_risks50_week0	z-scored count of probability-weighted fires within 5-50km of station, from prevailing quadrant
zpv_nr_risks40_week0	z-scored count of probability-weighted fires within 5-40km of station, from prevailing octant
znr_risks40_week0	z-scored count of probability-weighted fires within 5-40km of station
zpv_nr_risks30_week0	z-scored count of probability-weighted fires within 5-30km of station, from prevailing octant
znr_risks30_week0	z-scored count of probability-weighted fires within 5-30km of station

zpv_nr_risks20_week0 z-scored count of probability-weighted fires within 5-20km of station, from prevailing octant
znr_risks20_week0 z-scored count of probability-weighted fires within 5-20km of station
zpv_nr_risks10_week0 z-scored count of probability-weighted fires within 5-10km of station, from prevailing octant
znr_risks10_week0 z-scored count of probability-weighted fires within 5-10km of station
WKSfe_weekm_1 to WKSfe_weekm_676 week of year * municipality indicators
STYfe_yearm_1 to STYfe_yearm_78 year * municipality indicators
YRyear_2009 to YRyear_2014 year indicators
WKwoy_1 to WKwoy_52 week of year indicators
TSTAstation_1 to TSTAstation_13 Station/Municipality indicators
TSTAstation_1_trend to TSTAstation_13_trend Linear year trend per station/municipality

6. fires_birtheoutcomes.dta

Contains data from ../RESTAT_data/fires_birtheoutcomes.dta

obs: 26,399

vars: 831 7 Nov 2018 09:08

size: 86,456,725

variable name	variable label
CODMUNIC_6D	code of municipality of maternal residence
date_BR	date (stata numeric code)
codestation	station code
fe_yearmunic	year* municipality code
fe_weekmunic	week*municipality code
RH_dayavg_week0 to RH_dayavg_week_38	relative humidity average from week 0 to week lagged 38
TEMP_dayavg_week0 to TEMP_dayavg_week_38	temperature average from week 0 to week lagged 38
AVT_RH_dayavg_week0 to AVT_RH_dayavg_week38	interaction average temp. and average rel. humidity from week 0 to week lagged 38
NNE_wind_week0 to NNE_wind_week38	share of hours with wind blowing from NNE octant from week 0 to week lagged 38
ENE_wind_week0 to ENE_wind_week38	share of hours with wind blowing from ENE octant from week 0 to week lagged 38
ESE_wind_week0 to ESE_wind_week38	share of hours with wind blowing from ESE octant from week 0 to week lagged 38
SSE_wind_week0 to SSE_wind_week38	share of hours with wind blowing from SSE octant from week 0 to week lagged 38
SSW_wind_week0 to SSW_wind_week38	share of hours with wind blowing from SSW octant from week 0 to week lagged 38
WSW_wind_week0 to WSW_wind_week38	share of hours with wind blowing from WSW octant from week 0 to week lagged 38
WNW_wind_week0 to WNW_wind_week38	share of hours with wind blowing from WNW octant from week 0 to week lagged 38
NNW_wind_week0 to NNW_wind_week38	share of hours with wind blowing from NNW octant from week 0 to week lagged 38

nowindmeas_week0 to nowindmeas_week38 share of hours with no wind measured from week 0 to week lagged 38

nr_fires5_week0 to nr_fires5_week38 number of fires within city limits from week 0 to week lagged 38

pv_nr_risks50_week0 to pv_nr_risks50_week38

number of risk adjusted fires within 5-50km from center (prevailing octant) from week 0 to week lagged 38

res_nr_risks50_week0 to res_nr_risks50_week38

number of risk adjusted fires within 5-50km from center (non-prevail. octant) from week 0 to week lagged 38

nr_risks50_week0 to nr_risks50_week38

number of risk adjusted fires within 5-50km from center from week 0 to week lagged 38

zpv_nr_risks50_week0 to zpv_nr_risks50_week38

z-scored number of risk adjusted fires within 5-50km from center (prevailing octant) from week 0 to week lagged 38

zres_nr_risks50_week0 to zres_nr_risks50_week38

z-scored number of risk adjusted fires within 5-50km from center (non-prevail. octant) from week 0 to week lagged 38

znr_risks50_week0 to znr_risks50_week38

z-scored number of risk adjusted fires within 5-50km from center from week 0 to week lagged 38

LOCCODMUNIC_1 to LOCCODMUNIC_13 municipality indicators

pop birth cohort size (used as weights)

meanbr_weight mean birth weight in date-location

meanbr_lowbweight mean prevalence of low birth weight births (<2500 grams) in date-location * 1000

meanbr_vlowweight	mean prevalence of very low birth weight births (<1500 grams) in date-location * 1000
meangestationage	mean gestation age in date-location (weeks)
meanbr_premature	mean prevalence of premature births in date-location * 1000
meanbr_vpremature	mean prevalence of very premature births in date-location * 1000
meanbr_female	mean female births in date-location
meanbr_male	mean male births in date-location
meanbr_white	mean white births in date-location
meanbr_black	mean black births in date-location
meanbr_brown	mean brown births in date-location
meanmom_age_under25	share of moms under age 25 by date-location
meanmom_age_25to35	share of moms aged 25 to 35 by date-location
meanhadmiscarriage	share of moms with previous miscarriage by date-location
meanhadlivebirth	share of moms with previous live-birth by date-location
meanmom_married	share of moms formally married when child born by date-location
meanmom_cohabit	share of moms informally married when child born by date-location
meanmom_maritalDK	share of moms with unknown marital status by date-location
meanmom_nosch	share of moms with no schooling by date-location
meanmom_elementary	share of moms with elementary education by date-location
meanmom_high	share of moms with high-school education by date-location
meanmom_college	share of moms with college degree by date-location
meanmom_schDK	share of moms with unknown education by date-location
meanmom_HSless	share of moms with High-school or less by date-location
meanbr_gestunder22	share of gestations under 22 weeks in date-location
meanbr_gest23to27	share of gestations between 23 and 27 weeks in date-location
meanbr_gest28to31	share of gestations between 28 and 31 weeks in date-location
meanbr_gest32to36	share of gestations between 32 and 36 weeks in date-location

meanbr_gest37to41	share of gestations between 37 and 41 weeks in date-location
meanbr_gest42abov	share of gestations of more than 41 weeks in date-location
meanbr_gestDK	share of gestations of unknown duration in date-location

7. fires_birtheoutcomes_wfetaldeath.dta

Same variables as in the previous data set, with the addition of:

meanfetaldeath	mean prevalence of fetal deaths in date-location * 1000
poplive	size of live and dead births population in date-location
lnlivepop	ln transform of size of live births population in date-location
ratelday	share live births who died by first full day of life of life * 1000
ratelweek	share live births who died by first week of life * 1000
nr_fetalgrowth1d	count of fetal growth hospitalizations in 1st full day of life
nr_all_bd1d	count of all hospitalizations in 1st full day of life
